Investment transactions during the year (par value) are summarized on the attached Schedule 3.

During the year, the average rate of return of long-term investments purchased was 10.677%. The net earned rate of the Fund was 10.561%.

An Investment Advisory Committee, consisting of the Commissioner of Municipal Superannuation and the Director, Finance, Superannuation Commission, together with representatives from the Ministry of Finance, and the Union of B. C. Municipalities Joint Advisory Committee on Pensions, meets on a quarterly basis during the year and sets guidelines and policy under which investments may be purchased and sold.

The investment strategy followed for 1985 recommended a portfolio mix of 70% long-term and 30% short-term. Investment purchases and sales were managed to achieve this portfolio mix. Long-term investment purchases were in the five to ten year sector of the bond market.

The Superannuation Commission is responsible for cash management and advises the Provincial Treasury of funds available for investment.

Section 30 (2) — An actuarial valuation of the assets and liabilities of the Fund is required to be made by an actuary from time to time at intervals of not more than five years. The most recent valuation was carried out as at December 31, 1982. This valuation disclosed an unfunded liability of $700,454,000 in respect of basic pension benefits, given the present statutory levels of employee and employer contributions.

AUDITOR'S REPORT

To the Commissioner of Municipal Superannuation, and
To the Provincial Secretary and Minister of Government Services,
Province of British Columbia:

I have examined the statement of financial position of the Municipal Superannuation Fund as at 31 December 1985 and the statement of changes in fund balance for the year then ended. My examination was made in accordance with generally accepted auditing standards, and accordingly included such tests and other procedures as I considered necessary in the circumstances.

In my opinion, these financial statements present fairly the financial position of the Fund as at 31 December 1985 and the changes in the fund balance for the year then ended in accordance with the stated accounting policies as set out in note 2 to the financial statements applied on a basis consistent with that of the preceding year.

MUNICIPAL SUPERANNUATION FUND

NOTES TO FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 1985

1. DESCRIPTION OF THE MUNICIPAL SUPERANNUATION PLAN

(a) General

The plan is a defined benefit pension plan, whereby benefits are not linked directly to contributions. The plan is open to eligible employees of a municipality, hospital, school district, regional college or other employer to which the Pension (Municipal) Act applies.

(b) Retirement Benefits

Members are eligible for unreduced benefits if they retire at age 55 with a minimum of 35 years contributory service, at age 60 with a minimum of 10 years contributory service and at age 65 with less than 10 years contributory service. Reduced pensions are available at age 55 with a minimum of 10 years contributory service, and at age 60 with less than 10 years contributory service.

Certain groups of employees are eligible for retirement benefits at an earlier age. Hospital employees must have a minimum of 10 years contributory service to be eligible for a pension benefit.

The plan provides a pension of 2% per year of service prior to age 65 up to a maximum of 70% of the average salary earned in the five highest earning years before retirement. At age 65, date of death, or disability there is a reduction in the formula as a result of the integration with the Canada Pension Plan. Reference should be made to the plan text for a more detailed description of the benefits.

(c) Termination Benefits

A terminating employee may choose between leaving accumulated contributions on deposit or obtaining a refund. The refund includes interest credited. Employees leaving contributions on deposit for a minimum of 10 years are entitled to a deferred pension benefit if they have completed a minimum of 10 years contributory service.

(d) Other Benefits

Disability and Survivor benefits are available under the plan.

2. SIGNIFICANT ACCOUNTING POLICIES

(a) General Information

These financial statements have been prepared on the accrual basis of accounting. They show only the position of the Fund as at December 31, 1985 and the changes in Fund balance for the year then ended and do not purport to show the adequacy of the Fund to meet the obligations of the superannuation plan. The results of the latest actuarial valuation of the plan are described in Note 6.

(b) Investment Valuation

Long-term investments are those purchased with a term in excess of one year. They are carried at cost of acquisition adjusted as follows:

(i) Discounts and premiums on single maturity bonds are amortized on a straight line basis over the remaining terms of the bonds.
(ii) Discounts on serial bonds are recognized as income when redemptions occur.

Gains and losses on disposal of long-term investments are deferred and amortized on a straight line basis over the lesser of the remaining terms of the investments or twenty years. The amortization is charged against income from investments.

Short-term investments are carried at cost of acquisition.

3. LONG-TERM INVESTMENTS

Long-term investments held at the end of the year are as follows:

	1985	1984
	$	$
Book Value	1,483,114,002	1,131,357,636
Par Value	1,557,760,578	1,187,031,953
Market Value	1,490,067,572	1,001,653,848

4. DEFERRED LOSSES LESS GAINS ON SALE OF INVESTMENTS

	1985	1984
	$	$
Balance at beginning of year	20,370,195	3,160,835
Losses less gains on sale of investments	(2,614,262)	17,851,652
	17,755,933	21,012,487
Amortization for the year	(1,966,783)	(642,292)
Balance at end of year	15,789,150	20,370,195

5. FUND BALANCE

The Fund balance is made up of a Basic Account, a Retirement Annuity Account and an Inflation Adjustment Account. The Inflation Adjustment Account was created in 1980 to finance the payment of inflation adjustment supplements. These supplements are adjusted each January 1st and are related to the annual increase in the Consumer Price Index as at each previous September 30th, but may be limited by the availability of funds in the Inflation Adjustment Account to provide the capitalized value of the increases.

The Inflation Adjustment Account includes contributions by employees and employers each at the rate of 1% of salary, the interest income therefrom, and the interest income earned at a rate in excess of that assumed by the actuary on fund assets held in the Basic Account in respect of pensions being paid. It is decreased by refunds to former contributors, payment of investment management fees in respect of Inflation Adjustment Account investments and transfers to the Basic Account in respect of the capitalized value of inflation adjustment supplements granted. The Retirement Annuity Account consists of employees' voluntary contributions, employees' and employers' special agreement contributions and the interest income therefrom. The Basic Account consists of all other assets of the Fund.

Excess interest earnings for the year ended December 31, 1985 amounting to $32,734,087 ($24,700,986 in 1984) transferable from the Basic Account to the Inflation Adjustment Account are reflected in the Accounts balances. Effective January 1, 1986, inflation adjustment supplements at the rate of 4.1% (3.8% effective January 1, 1985) of the basic lifetime portion of contributory allowances in force were granted. The capitalized value of these inflation adjustment supplements was $23,968,319 ($21,957,247 in 1985), and was transferred from the Inflation Adjustment Account to the Basic Account.

6. ACTUARIAL VALUATION

According to the Pension (Municipal) Act, an actuarial valuation of the assets and liabilities of the Fund is required to be made by an Actuary from time to time at intervals of not more than five years. The most recent valuation was carried out as at December 31, 1982. The actuary advised that the unfunded liability as at that date was $700,454,000 for basic pension benefits. This represented an increase of $293,182,000 since December 31, 1979. The Actuary also stated that he did not see the increase in the unfunded liability as a threat to the continued payment of pensions to current and prospective pensioners or to the financial health of the plan.

The contributions required under the superannuation plan have been determined under a "level contribution" funding method. This method expresses employer contributions as a constant percentage of future payrolls that, together with future employee contributions and investment earnings, will finance the benefits for a typical new entrant to the plan and, in addition, will maintain the unfunded liability as a constant percentage of future payrolls.
